# B.Sc. in Construction Project Management (Top-Up)

MQF Level 6 | 84 ECTS

## COURSE DESCRIPTION

Construction projects are highly complex, requiring skilled management of scope, costs, timeframes and quality, in line with various pieces of legislation.

These projects also typically involve a very broad range of stakeholders, ranging from the neighbouring community, to owners, contractors, workers and more. Consequently, effective stakeholder management is key.

The construction project manager requires the skills and knowledge to be able to oversee all of the above-mentioned factors, ultimately ensuring that a construction project is executed in a smooth and efficient manner, whilst effectively taking into consideration health and safety and environmental issues, as well as other applicable legal frameworks.

This course will address related construction project processes, legal aspects, management skills, health and safety legislation, and environmental and sustainability issues.
